SEA-Tech News Release Apr 2011

SEA-Tech is making its debut at the GeoDrilling 2011 exhibition at EXEC Peterborough and will be exhibiting the new range of Mini-Pile, Soil Nail and Screw Anchor systems.

The new SEA-Tech "MOLE" soil anchor displacement drilling bit will be on display for the first time. Designed for use as a soil nail drill bit, the "MOLE" soil displacement system is a unique product suitable for anchoring in difficult ground conditions and not only does it dramatically reduce for waste removal, but also enhances the ground strength providing assurance for both designers and contractors.

SEA-Tech piling systems have proved very successful throughout the world and excel where other piling systems have failed.

We look forward to seeing you **at our stand No.W3** and discovering the benefits of using SEA-Tech piling systems. A full range of SEA-Tech products will be available to view at GeoDrilling 2011 and our experienced technicians will be on hand to provide help and advice.

Design and usage of the products should be in accordance with the appropriate safe practices and applicable codes and regulations.
